Personal Summary

A driven B.Tech IT student with hands-on experience in web development, programming, and problem-solving. I've worked on building interactive websites and applications using modern tools and technologies. In addition to my academic journey, I've gained practical business management skills by running a women's fashion business during Navratri.

Soft Skills

Teamwork | Communication | Problem-Solving | Leadership | Business Management

Certification

Developing Websites and Front-Ends with Bootstrap -(2025)
Initiating and Planning Projects - (2024)
Power Bi – (2024)

Projects

Online Code IDE | Apr 2025
Developed an online code editor using React.js and Firebase to support real-time code writing and previewing in the browser. Integrated syntax highlighting and auto-save features for an interactive coding experience.

Resume Builder Website | Apr 2025
Built a dynamic resume building website using React.js, integrated with Gemini AI for smart suggestions and Strapi as the backend CMS. Enabled users to create, edit, and download professional resumes with ease.

Alarm Clock | Jul 2024
Created a desktop-based Alarm Clock application using Java Swing. Implemented GUI components for time setting, sound alert, and user-friendly interface for time management.
